

About holding

Sigma Group of Companies was founded in 1991 as a production and trading company. Today, the Sigma Group of Companies is the largest agro-industrial holding in the Ural District and the Republic of Bashkortostan. The main activity of the holding is the production and sale of vegetable oil and its processed products with a total production volume of 380 000 mt. of vegetable oil and 332 000 mt. of granulated meal per year. The group of companies includes: oil extraction plants of LLC "Chishminsky" and LLC "Elevator", elevators for storing raw materials, as well as a plant for the production of packaged vegetable oil.

Oil extraction plant «Elevator» LLC

The oil extraction plant of LLC "Elevator" produces the main part of the pressed oil intended for sale to the company's partners. The plant is located in the Republic of Bashkortostan, the city of Kumertau. LLC "Elevator" is a modern large-scale investment project of the Sigma Group of Companies. The plant was put into operation in 2015 using the most modern energy-saving technologies, works on European equipment, which makes it possible to produce oil with a low content of oxidation products and phospholipids. The innovative production site allows processing up to 520 000 mt. of sunflower seeds per year. The volume of pressed sunflower oil produced by the MEZ reaches 230 000 mt. per year. The volume of sunflower meal reaches 200 000 mt. per year. The main sales channel of the manufactured products is the export direction.

Oil extraction plant «Chishminsky MEZ» LLC

The plant is located in the Republic of Bashkortostan, R. P. Chishmy. The plant specializes in the production of unrefined and refined deodorized sunflower oil, as well as processed products based on sunflower seeds and rapeseed. "Chishminsky MEZ" entered the structure of the holding in 2006 and was qualitatively modernized. The volume of processing of sunflower seeds of the plant reaches up to 340 000 mt. per year. The plant has launched a shop for processing and deodorizing vegetable oil with a capacity of 108 000 mt. per year, a shop for granulating meal. The annual production of vegetable oil reaches 150 000 mt. of vegetable oil and 132 000 mt. of sunflower meal. The vegetable oil produced at the Chishminsky oil extraction plant is sent to the company's partners for the production of margarine, mayonnaise, as well as for the production of bottled sunflower oil inside the holding.

Plant for the refinement and deodorization of vegetable oils «Sigma» LLC

It is located in the Chelyabinsk region, Kopeysk. The plant became the first production site in the structure of the holding. The plant was built in 1999. In 2004, the plant carried out a technological re-equipment of its production assets (ALFA LAVAL, Sweden). Refined oil production facilities have been put into operation (production capacity of 90 000 mt. per year). In 2007, two new lines for the production of bottled oil (SIPA Italy) were put into operation. This allowed us to bring the level of production of bottled oil to 84 000 mt. per year. The warehouse of the plant is equipped with four loading points for vehicles and three points for servicing railway rolling stock.

Grain storage complexes

Surgut feed mill, located in Samara region, p. Surgut.

Founded in 1934, entered the holding structure in 2010. The result of the merger was the accelerated construction and commissioning of the second stage - the extraction workshop and the CHP.

The modernization made it possible to provide capacity for the simultaneous storage of sunflower seeds - 50 000 mt.

Platovsky elevator, located in Orenburg region.

Joined the structure in 2016. Since the incorporation of the Platovsky elevator into the structure of the «Sigma» Group of Companies, the enterprise has been modernized. Grain storage capacities were increased, equipment was modernized.

Currently, the Platovskiy elevator is able to store sunflower up to 21 000 mt.

Complex for grain storage Sharlyksky, located in vil. Privetlivy, Orenburg region.

The elevator was built from scratch in the Sharlyk district of the Orenburg region and put into operation in October 2019.

The company is actively accepting and storing sunflower seeds of 35 000 mt. at a time.

Grain storage complexes

Saraktash elevator (located in Saraktash vil, Orenburg region)

The elevator has become an additional platform for collecting and storing sunflower seeds for the needs of Sigma Group of Companies and performs a strategically important function - providing the company's oil extraction plants with raw materials for the marketing season. This enterprise is active, has a developed infrastructure for working with suppliers of sunflower seeds. The capacity for one-time storage of sunflower is 50 000 mt.

Khlebnaya Baza 39 (located Lenki Station Altaisky reg.).

The enterprise is a complex of three seed warehouses and an elevator. The enterprise boasts the seed storage capacity of 200,000 tons at a time. The enterprise is equipped with highly productive dryers. In addition to the possibility of shipment of seeds by road, the company has the ability to ship them by rail, For this purpose the enterprise has an industrial approach railway line.

Transport

«Sigma» Group of Companies has its own railway rolling stock for transportation, which includes:

- Railway tanks with a loading capacity of up to 68 tons – 300 pcs.
- Hoppers (bunker freight cars) – 350 pcs.

An important technological link in the activities of the «Sigma» group of companies is the motor transport workshop, the purpose of which is to provide plants with sunflower seeds, supply the plant with vegetable oils for processing, and supply customers with crude unrefined and refined oil.

Own fleet of 150 vehicles. The fleet is represented by such brands as: «Volvo», «Scania», «Mercedes», «MAZ». For transportation of raw materials, «Schmitz» and «MEGA» semitrailers are used, as well as finished products «Sespel», «Feldbinden», «Burg», «Magyar». The average age of operating equipment is 3-5 years.
